DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, and 7-9, drawn to a process of selectively increasing the production of propionate in the gastro-intestinal tract of a mammal by administering dextran.

Group II, claim(s) 2 and 10-12, drawn to a process of decreasing blood cholesterol levels in a mammal by administering dextran.

Group III, claim(s) 3 and 13-15, drawn to a process of decreasing blood triglyceride levels in a mammal by administering dextran.

Group IV, claim(s) 4 and 16-18, drawn to a process of decreasing very low density lipoprotein levels in a mammal by administering dextran.

Group V, claim(s) 5 and 19-21, drawn to a process of increasing high density lipoprotein levels in a mammal by administering dextran.

Group VI, claim(s) 6 and 22-24, drawn to a process of increasing insulin sensitivity in a mammal by administering dextran.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

A common inventive concept is lacking between groups I through VI in view of Misuhashi *et al.* (EP 382355), of record, which demonstrates that the compositions of comprising dextran for nutritional use lack novelty with respect to their use for medicinal purposes. Therefore, the method of use of the claim designated administration to mammals for nutritional purposes lack those technical features that define a contribution which each of the inventions considered as a whole, makes over the prior art. Therefore, a technical relationship is lacking among the claimed inventions involving one or more special technical features. In

Art Unit: 1651

addition, the methods of Groups I through VI lack an indication as to the dosages, levels of purity and/or additional requirements for their functional intended use.

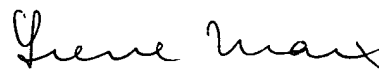

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irene Marx whose telephone number is (703) 308-2922. The examiner can normally be reached on Monday through Friday from 6:30 AM to 3:00 PM.
